Nik Nur Najwa - LinkedIn | Kota Bharu, Kelantan

SUMMARY

Final year Software Engineering student with experience in web application development, system design, and API integration through academic projects. Strong interest in software engineering and data analytics, with strengths in analytical thinking, problem-solving, and adaptability. Seeking a six-month internship placement from 3 August 2026 to 15 January 2027.

EDUCATION

Universiti Malaysia Terengganu

BCS (Software Engineering) with Honours

Oct 2023 - Present

- Dean's List Award for Semesters 2-5
- Current CGPA: 3.51

Foundation in STEM

Aug 2022 - July 2023

- CGPA: 3.78

WORK EXPERIENCE

Cashier at Bukan Kedai Burger (UMT's Limbong Cafe)

April 2026 - Present

- Managed customer orders in a fast-paced environment while developing communication, teamwork, and multitasking skills through customer service and coordination with kitchen staff.

ACADEMIC PROJECTS

Grocify: Grocery Management System (FYP)

Oct 2025 - Present

- Developing a web-based grocery management system for pantry tracking, recipe recommendation, and shopping list generation using Java EE and MySQL.
- Enhancing system efficiency through backend logic and relational database design to support smooth data flow and integrated module functionality.
- Helps users reduce food waste through smarter grocery management, with planned enhancements including barcode scanning and API integration for personalised dietary and health needs.

Expense Tracker System

April 2025 - June 2025

- Developed a web-based expense tracking system with user authentication, real-time dashboard updates, and financial reporting features.
- Improved system accuracy and data consistency by refining financial logic and backend structure through iterative debugging.
- Served as group leader responsible for full-stack development and documentation to help users manage budgets and track spending effectively.

QuickBite: Food Delivery System

April 2025 - June 2025

- Developed a web-based food delivery system with full order lifecycle features including browsing, ordering, tracking, meal suggestion, and reviews.
- Enhanced food ordering workflows by integrating Spoonacular, Google Maps, and PayPal APIs while handling UI/UX design and backend functionality.
- Contributed as the main web developer in a group project to support faster and more personalised food ordering experiences.

ACTIVITIES

Javathon “Code Warrior: Java Awaken”

May 2026 - Present

- Developing a blue economy themed system using Java and OOP concepts
- Designing system UML diagrams and functional poster presentation

HIMMAT Datathon 2026

April 2026 - Present

- Conducting data cleaning, visualization, and analysis

- Presenting findings through academic research poster

ARM On-Demand Training

March 2026

- Participated in ARM CPU: Cortex-R and Cortex-M sessions
- Gained exposure to ARM Corstone Compute Subsystem architecture

ADDITIONAL INFORMATION

Technical Skills

- **Languages:** Java, Micropython
- **Frontend:** HTML, CSS, JavaScript, JSP
- **Backend:** Java EE, Node.js, Postman
- **Database:** MySQL, phpMyAdmin
- **Concepts:** OOP, DSA, SAD, SDLC, Agile
- **Tools:** Apache, VS Code, IntelliJ IDEA, Figma, Visual Paradigm
- **Extra:** Microsoft 365, Google Workspace, GitHub, VirtualBox, Kleopatra, HashTools, Thonny, ThingSpeak, Blynk, Cisco Packet Tracer

Soft Skills

- Adaptable and quick to learn new technologies
- Strong problem-solving and analytical thinking
- Good time management under deadlines
- Effective communication and teamwork in group projects
- Languages proficiency: Bahasa Melayu (Native), English (Proficient), Mandarin (Elementary)
